AI Developer, Digital Marketer, and Web Developer building AI-powered products and automation systems for real businesses. Founder of KB AI, delivering voice AI agents, SaaS platforms, and client web applications across fintech, healthcare, and e-commerce. Skilled at end-to-end delivery — from LLM-driven voice pipelines and n8n automations to full-stack apps and growth-focused digital marketing — with a track record of shipping production systems solo and for clients.

EXPERIENCE

Founder & AI Developer

KB AI

2023 – Present

Tirupati, India (Remote)

- Founded and operate KB AI, a Digital Transformation company delivering voice AI agents, SaaS products, and client-facing web apps, covering the full stack from architecture to deployment.
- Built and shipped multiple production Telugu/English AI voice agent pipelines using LiveKit Agents, Pipecat, Sarvam AI STT/TTS, Google Gemini, Cartesia voice cloning, and Twilio telephony for outbound sales and lead qualification.
- Designed n8n and Make.com automation workflows integrating Google Calendar, Gmail, WhatsApp (Twilio), and CRM systems, cutting manual lead-handling effort and accelerating client sales cycles.
- Authored a large-scale enterprise AI system quotation (ADZiA AI Operating System) spanning 110 agents across 9 functional teams for enterprise digital transformation.
- Ran digital marketing and lead-generation pipelines (Meta Marketing API, Meta Lead Ads, Vibe Prospecting/Explorium) to source and qualify B2B leads for KB AI and its clients.

Full-Stack & AI Product Developer

Independent / Freelance (Upwork)

2022 – Present

Remote

- Delivered full-stack web and mobile applications for clients using React, Node.js, FastAPI, PostgreSQL, and Flutter, with Firebase, Razorpay, and OneSignal integrations.
- Built UrbanPress, a production-ready laundry-service customer app (Next.js 14, Firebase, Razorpay, Geoapify) covering bookings, payments, and geolocation-based service.
- Reverse-engineered and rebuilt P2P fintech trading platform architecture (ShaktiPay-style RP token trading) with Razorpay, RazorpayX, MSG91, Socket.io, and Redis.
- Deployed and maintained cloud infrastructure on AWS and Railway for client SaaS products, ensuring reliable production uptime.

Data Science & Deep Learning Coursework

MCA Program

2023 – 2024

Andhra Pradesh, India

- Completed academic deep learning research, including a Cardiac MRI segmentation project as part of MCA coursework.
- Applied data science and machine learning fundamentals to inform product and automation decisions across company projects.

PROJECTS

- KB AI — Telugu Outbound Sales Voice Agent (“Vaishnav”): Real-time Telugu voice agent on LiveKit Agents for business lead outreach across Andhra Pradesh & Telangana; resolved TTS Unicode fragmentation, audio buffering, and call-termination issues.
- ADZiA AI Operating System: Enterprise-scale AI system proposal covering 110 agents across 9 functional teams for large-organization digital transformation.
- Antigravity: AI-first creator monetization platform (Stan.store competitor) with Firebase/Supabase push-notification architecture and full product requirements.
- KB AI Voice Agent + Dashboard: Full Pipecat-based voice agent stack (Sarvam STT/TTS, Gemini, Cartesia, Twilio) with an enterprise analytics dashboard.
- UrbanPress: Production laundry-service app with bookings, Razorpay payments, and location-based service discovery.
- ClinicOS & DoctorAI Pro: WhatsApp-native clinic management SaaS and multi-specialist healthcare AI platform for Tier 2/3 markets.

- Gesture-Controlled 3D Car Configurator: Interactive Three.js configurator driven by real-time hand tracking (MediaPipe Hands).
